Re: Ex Parte Notice, Docket Nos. PS 06-229, PS 12-94

Dear Ms. Dortch:

Pursuant to 47 C.F.R. § 1.1200, et seq., Harris Corporation (“Harris”) hereby notifies the Federal Communications Commission (“Commission”) of the following ex parte communication in the above-referenced proceedings.

On June 27, 2012, I, the undersigned, on behalf of Harris, met with Paul Murray, Legal Advisor to Commissioner Jessica Rosenwerfel. The discussion centered on a June 18, 2012 letter to Mr. David S. Turetsky, Chief, Public Safety and Homeland Security Bureau from Stephen M. Marschilok, President, Public Safety and Professional Communications, RF Communications, Harris Corporation (filed in the above-referenced dockets).¹ During this meeting, I stated that this letter and its supporting documents suggest two alarming factors contradicting claims in the State of Texas’ Interoperability Showing:

- 1) The State of Texas is deploying non-interoperable products as it builds its public safety broadband network; and
- 2) The State of Texas is not allowing or even encouraging a multi-vendor market for its public safety network build out.

I urged that the Commission not allow approval of Texas’ Interoperability Showing or otherwise allow operations of Texas’ public safety broadband network until there is clear and independently confirmed proof that the system Texas is deploying is truly interoperable and supports and actually implements a full and open competitive multi-vendor environment at the device and network levels.

Respectfully submitted,

/S/
